International Journal of Fracture

CONTENTS OF VOLUME 80 (1996)

Vol. 80, No. 1, 1996

Dynamic fracture analysis of an inclined subsurface crack subjected to dynamic moving loadings	CHIEN-CHING MA and LYANG-RUNG HWANG	1–18
The ultimate ductile state model for a pipe with an axial through crack	I.V. ORYNYAK and V.M. TOROP	19–32
Energy balance analysis on mode-III dynamic crack propagation in fixed-sided strip	F. ZHOU and T. SHIOYA	33–44
A new conservation integral for an arbitrarily kinked interfacial crack	S.Y. CHOI, H.G. BEOM and Y.Y. EARMME	45–57
Analytical forms of higher-order asymptotic elasic-plastic crack-tip fields in a linear hardening material under antiplane shear	S. YANG, F.G. YUAN and M.Y.M. CHIANG	59–71
Fracture toughness of re-entrant foam materials with a negative Poisson's ratio: experiment and analysis	J.B. CHOI and R.S. LAKES	73–83
Finite element analysis of local damage and post-failure behavior for strain-softening solid	LI ZHAOXIA and XIAO LIGUANG	85–95
Errata: Standardized complex and logarithmic eigensolutions for *n*-material wedges and junctions	S.P. PAGEAU, K.S. GADI, S.B. BIGGERS, Jr. and P.F. JOSEPH	97

Vol. 80, Nos. 2–3, 1996

High Cycle Fatigue

Preface	M.L. WILLIAMS	99–100
Guest Editor Foreword	D.L. McDOWELL	101–102
Basic issues in the mechanics of high cycle metal fatigue	D.L. McDOWELL	103–145
High cycle fatigue in aircraft gas turbines – an industry perspective	B.A. COWLES	147–163
Recent advances in fatigue crack growth modeling	H. SEHITOGLU, K. GALL and A.M. GARCÍA	165–192

Application of a closure model to predict crack growth in three engine disc materials	J.C. NEWMAN, Jr.	193–218
On the use of the Goodman diagram for high cycle fatigue design	T. NICHOLAS and J.R. ZUIKER	219–235
An assessment of the role of near-threshold crack growth in high-cycle-fatigue life prediction of aerospace titanium alloys under turbine engine spectra	J.M. LARSEN, B.D. WORTH, C.G. ANNIS, Jr. and F.K. HAAKE	237–255

Vol. 80, No. 4, 1996

Reinitiation of a crack reaching an interface	J. LEMAITRE, R. DESMORAT, M.P. VIDONNE and P. ZHANG	257–276
The stress intensity factors of slightly undulating interface cracks of bimaterials	CHAO-HSUN CHEN and JINHON HSU	277–293
Influence of test parameters on the measurement of the essential work of fracture of zinc sheets	Y. MARCHAL and F. DELANNAY	295–310
Elastic–plastic analysis of an arbitrarily-oriented mode III crack touching an interface	J. LI and X.B. ZHANG	311–337
Arc sine $\sqrt{P}$ transformation – an effective tool for graphical and numerical evaluation of planned Wöhler experiments	D. DENGEL and M. KARIM KHANI	339–351
Precise elastic–plastic analysis of crack line field for mode II plane strain crack	YI ZHI-JIAN, WANG SHI-JIE and WU HENG-LI	353–363
The sensitivity of J-integrals to material law variations for semi-elliptical surface cracks	D.P. BOOTHMAN, M.M.K. LEE and A.R. LUXMOORE	365–375
Author index		377
Volume contents		379–380
